DETAILED ACTION

Oath/Declaration

1. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Italy on October 15, 1998. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

Specification

Applicant's amendment regarding the headings of "Summary of The Invention", "Brief Description of The Drawings" and "Detailed Description" has not been entered because there are lack of precise instructions.

Note, page and line numbers do not match.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3652

3. Claims 2-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Figure 1 in the present application (admitted prior art).

Figure 1 (admitted prior art) discloses a vehicle lift comprising plurality of vehicle lifting runway 112, 114, a volumetric system including an operating fluid supply 124, a pair of main cylinders 116, 118 and a pair of secondary cylinders 120, 122 that cooperate to move the runways wherein the main cylinders receive fluid directly from the fluid supply 124 and each of the secondary cylinders receive fluid from a respective one of the main cylinders. As broadly claimed, at least one of the main cylinders 112 and 114, and at least one of the secondary cylinders 120 and 122 are associated with each runway and wherein the operating fluid outlet of each of the main cylinder which associated with one of the runways supplies a secondary cylinder which is associated with the other runway.

Response to Arguments

4. Applicant's arguments filed October 09, 2002 have been fully considered but they are not persuasive. Applicant argues that Figure 1 discloses that the source of operating fluid 124 supplies fluid directly to a first main cylinder 116 and to a first secondary cylinder 118. However, Applicant has not set forth the differences between a main cylinder and a secondary cylinder. Further, Figure 1 clearly readable on the claimed limitations.

Art Unit: 3652

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuy v. Tran whose telephone number is (703) 308-2558.
